Smart Medication Usage and Automation

Award-Winning Painting
Competition

Foreword

Since its establishment, **TriaTech® Tibbi Sistemler San. ve Tic. A.S.**, with the brand **STOCKART®** has been committed to providing economic and social benefits to its internal and external stakeholders, the environment, and society. They have undertaken a corporate social responsibility project in the field of art titled "**Smart Medication Usage and Automation.**" Through this project, with the support of young contestants, TriaTech® has implemented an award- winning painting competition project that will raise awareness in society about medication use and medication safety during the 2022-2023 academic year's second semester.

The competition region was deliberately selected as the Gaziemir district, where **TriaTech®**'s production facility for **STOCKART®** Automated Medication and Supply Management Systems products is located. The aim was to create awareness among middle school students in the district about the technologies produced in their surroundings. Allowing students to express this awareness through art, enabling them to showcase their interests and talents, and contributing contemporary and original works of art to the field of painting were among the project's objectives. The project was carried out for students attending state middle schools in İzmir's Gaziemir district.

The works of all students who participated in the competition were evaluated by Expert Art Historians from **Bozlu Art Project**, and the winners were determined.

The **STOCKART®** Special Award, on the other hand, was determined by the votes of the company's employees.

We extend our infinite gratitude to the **İzmir Gaziemir District National Education Directorate, Gaziemir District State Middle School Administrations**, the students **'Art Teachers**, and **Bozlu Art Project** for their support in planning, executing, and concluding the competition.

This booklet includes the works of all students who participated in the competition.

We sincerely congratulate all the talented students who showed interest in the competition and contributed new works to the world of painting.

About STOCKART®

STOCKART® Automated Medication and Supply Management Systems are equipped with advanced technologies and were developed in the R&D Center of **TriaTech® Tibbi Sistemler San. ve Tic. A.S.** located in Gaziemir, İzmir.

STOCKART® is a domestic and national Turkish brand owned by **TriaTech®**. It focuses on medication and supply management solutions with an emphasis on patient and medication safety. Through automation, all steps from the entry of medications and supplies into the institution to their use for patients can be managed in real-time.

STOCKART® modules allow for real-time tracking of medications and supplies from hospital storages to pharmacies, services, and patient bedsides.

About the Jury

Bozlu Art Project

Established in 2013 within the Bozlu Holding, which operates in the fields of health and technology, **Bozlu Art Project** aims to look at art from outside the conventional clichés. In this context, it strives to develop a different discourse for all elements of art by producing projects such as literature, panels, discussions, archives, and exhibitions.
